FOREIGN NEWS.

BY THE MAIL.

The Steamship America from Liverpool, with 114 passengers, arrived at Boston, on Thursday afternoon.

ENGLAND.—A very favorable change had taken place in the weather in England, which was thought would have a good effect on the wheat crop.

The reports of the spread of the potato disease are conflicting, but on the whole are unsatisfactory.

At Mark Lane, on the first inst., wheat was inclined to be dull, but some qualities fetched 2s. advance; foreign wheat was hardly moved. Flour was inactive, but firm; corn in demand. Ten firm.

Gold to the amount of £200,000 had arrived from Australia; money was in increased demand, the rate of discount being 3 1/4 per cent. The discount houses had given notice of their intention to raise the allowance for money on call from 2 1/2 to 3 1/4 per cent, and this, coupled with the rumor that the Bank of England was likely to make a further addition to their minimum charge, had cast a gloom over the market. A report was current the past week, that the Bank has been selling stock, but it was believed to be untrue.

A Frenchman, named Edward Rayman, has been arrested at Southampton, on a charge of having conspired with others to murder the French Emperor. He was taken to London for examination.

TURKEY AND RUSSIA.—It was feared that the Emperor of Russia would decline to withdraw his forces from the principalities, as stipulated for in the proposition of the three powers. The English and French fleets would in that case be ordered to pass the Dardanelles, and a peaceful settlement be greatly jeopardized. The telegraph dispatch of the 20th, states that the Porte and the representatives of the great powers had accepted the proposition of the Austrian Minister, which arranged that the English and French fleets should withdraw from Bosnia Bay, whilst the Russians evacuated the Danubian provinces; Turkey would then send an ambassador to open negotiations at St. Petersburg. Conferences were then to be opened at Vienna, by the consent of Russia.

The Morning Chronicle reaffirms that the United States had offered the Porte money and active forces.

The Egyptian fleet with 12,000 men arrived at Constantinople on the 19th.

Admiral Dundas, of the English fleet, with all his captains, had been on a reconnaissance of the Turkish fortresses.

There was rumor in Vienna of a secret treaty between the United States and the Porte, and the probable cession of Marmariza. Three American frigates were said to be in the Bosphorus.

Another Ministerial crisis was feared at Constantinople.

Great uneasiness was created by the news of a decree of the Czar, ordering a fresh levy of recruits throughout the Empire, which was interpreted as a war measure.

Moldavia had declared itself independent of the Porte, and refused to pay further tribute. A similar movement is expected in Wallachia.

It is asserted that the Porte intends addressing an ultimatum to Russia, in which, after paying due regard to the rights of the Sultan's Christian subjects, that sovereign declares that if, in spite of their repeated assurances, the Czar should persist in offering war, the Porte will be resolved to accept it, but that the responsibility must lie with Russia. The above document, it is further asserted, has been communicated to the ambassador of France and England.

Orders have been sent to the Hospodars of Moldavia and Wallachia, commanding them to take the principalities, and retire to the right bank of the Danube.

CAUGHT BY AN ALLIGATOR.—The Galveston News has the following account of a most painful occurrence in Orange county, Texas:—We have just learned from Mr. C. C. Burch, from Sabine Pass, that ten days ago, a small girl ten years old, a daughter, he thinks, of Mr. Solomon Sparks, living at the mouth of Old River, Orange county, was caught by an alligator, as she was wading out to gather the nuts of the pond lily, and was horribly mutilated. Both her arms and both her legs were bitten off by pieces, and swallowed by the alligator, until her body was left limbless, and, of course, lifeless. This occurred near the residence of Mr. Sparks.

As soon as the alarm was given, the alligator was shot and his body was opened, where there was found not only the limbs of the unfortunate little victim, but also a pair of pants, loons, with a pocketbook in the pocket, containing some money. The pants were supposed to belong to a man, who had not long since been drowned in the Old River.

GENERAL JACKSON'S FIRST APPEARANCE IN CONGRESS.—When Mr. Gallatin was a member of Congress, in the year 1796, Tennessee was admitted as a State into the Union, and sent her first member to Washington. One day when in his seat in the House, Mr. Gallatin noticed a tall, lank, uncouth-looking individual, with long locks of hair hanging over his brows and face, with a queue hanging down his back, tied with an eel skin. The dress of this individual was singular; his manner and deportment that of a backwoodsman. The appearance of so singular a character on the floor of the House of Representatives naturally attracted attention, and a member by his side asked who he was. Mr. Gallatin replied that it was the member from the new State. "Well," said his friend, "he seems just the sort of chap one might expect from such an uncivilized region as Tennessee." The individual in question was Andrew Jackson.

ACCIDENT FROM FLUID EXPLOSION.—Mrs. Thankful P. Partridge was very seriously burned by an explosion of burning fluid on Wednesday night. Immediately preceding the sad accident she was arranging to fill a lamp, having said that for that purpose exposed in an open can. To aid her in this operation, she was about lighting a nether lamp, having struck a match for that purpose. At this moment the explosion occurred, precisely by what means the unfortunate lady cannot determine, so great was her terror. She was instantly enveloped in flames. Her screams called some members of the family to her assistance, who only saved her life by instantly stripping the burning garments from her body. Of the recovery of Mrs. Partridge some doubts are entertained. —*Portland Advertiser.*

A FEARFUL ACCOUNT.—Mr. Everett, late Secretary of State, is generally known as a gentleman of extensive information; one who will not "speak without book" on important subjects involving statistical facts. From a correspondent of his, it appears that the use of alcoholic beverages costs the United States directly, in ten years, \$120,000,000; has burnt or otherwise destroyed \$5,000,000 worth of property; has destroyed \$3,000,000 lives; sent 520,000 to prison and 100,000 children to the poor houses; caused 1500 murders and 5000 suicides; and has bequeathed to the country 2,000,000 orphan children.

CHINA.—Hong Kong letters of May 24th, state that the insurgents were fortifying Nankin. They do not intend assaulting Shanghai. No decisive action with the Imperialists had taken place. The latter were still in force around Nankin.

NEW YORK BANKS.—It appears from the first weekly statement of the N. Y. City Banks, fifty four in number, that they have a loan of \$97,889,449; specie \$9,746,441; circulation \$9,513,058; deposit \$57,996,255.

FOUR EDITORS IN NEW ORLEANS.—The yellow fever has been spreading in New Orleans, and four editors have been attacked by it. One of them, Mr. [Name], is now in a critical condition.

THE HOT WEATHER AND ITS DREAFFUL EFFECTS.—Since the thunder storm which occurred on Monday night last, the weather in New York has been excessively hot. On Tuesday the mercury ranged from 80 to 85 degrees during nine hours. On Wednesday, the heat increased to 90 degrees, and did not fall below 80 degrees for fifteen hours. On Thursday the mercury rose to 91 degrees, and the average temperature indicated by the thermometer for fifteen hours, was 86 1/4 degrees. Yesterday at 8 A.M. the mercury stood at 82 degree, at 3 P.M. it reached 93 degrees, and at 6 P.M. it had not fallen below 88 degrees. To-day the heat is no less intense than it was yesterday. The sky is unclouded, and the sun shines with "forceful rays." At 12 1/2 o'clock the thermometer at Pike's in Broadway indicated a temperature of 94 degrees in the shade!

The books of the coroners' office present a terrible record of deaths from sun strokes. Thirty fatal cases were reported up to 5 o'clock yesterday afternoon, and a great number of persons were seriously indisposed by the heat. The poor horses doomed to the drudgery of dragging the omnibuses and railcars are equally fatal. A number of these unfortunate animals fell dead yesterday, and many were incapacitated for labor. To add to the misfortunes of the horses, during this hot weather all the public vehicles are crowded more than usual, every body who can ride being too warm and too indolent to walk.

THE INEFFICIENCY OF MUNICIPAL OFFICERS "sticks out" at New Orleans. In the cemetery of the 5th district six men were constantly employed digging the shallow graves for the victims of the pestilence, but were unable to provide for all the corpses carried there by the carmen. Forty of them remained above ground from Friday evening the 5th till Sunday morning the 7th. Some of the swollen bodies burst their coffins, and the effluvia rendered the neighborhood horrible.

When the citizens complained, the street commissioners replied that it was difficult to obtain laborers to do the work of burial, and the mayor, when informed of the facts, said the matter "did not fall within his line of duty!" In the same cemetery on Sunday night, Sept. 1st, seventy-eight corpses were buried, although men had been burying the dead all day. The board of health had offered \$5 an hour for additional grave diggers, without obtaining them. In St. Patrick's cemetery corpses were left uncovered on account of scruples about consecrated and unconsecrated ground.

DEATH OF A YOUNG LADY BY DROWN-ING.—On Friday evening, Miss Hughes, a young lady from Syracuse, who for a few days back had been stopping with the family of Mr. Benson, at the corner of 84th street, while bathing in the East River at the foot of 25th street, was drowned.

While enjoying the water, Miss Hughes was suddenly seized, as is supposed, with a cramp, and screaming, sunk beneath the surface. A young man who was with Miss Hughes at the time, attempted to swim to the shore, but also sunk; Mr. Benson went out to her assistance, but was seized by the young man, and drawn under the water. They finally succeeded in reaching the shore, when Mr. Benson again started to go back for Miss Hughes, but was seized with cramps, and unable to do anything to save her, and she was carried, in a moment beyond their reach, by the under current.

"HOW LONG SHALL WE WAIT?"—A few years ago, the late superintendent of the Eastern Railroad, in reply to a conductor who asked the question, "How long shall we wait for the up train when it is late, before we can proceed?" said, "Wait until the wheels rust off, and then get new ones." Without doubt the Superintendent would be voted an "old fogey," by a large portion of the community—a man by no means fast enough for the present generation, inasmuch as he would not take the risk of landing his passengers interitely, but preferred to allow them to growl at the railroad, and denounce its slow management, rather than to place in peril their lives and limbs. —*Carrier*

A FEARFUL ACCOUNT.—Mr. Everett, late Secretary of State, is generally known as a gentleman of extensive information; one who will not "speak without book" on important subjects involving statistical facts. From a correspondent of his, it appears that the use of alcoholic beverages costs the United States directly, in ten years, \$120,000,000; has burnt or otherwise destroyed \$5,000,000 worth of property; has destroyed \$3,000,000 lives; sent 520,000 to prison and 100,000 children to the poor houses; caused 1500 murders and 5000 suicides; and has bequeathed to the country 2,000,000 orphan children.

CHINA.—Hong Kong letters of May 24th, state that the insurgents were fortifying Nankin. They do not intend assaulting Shanghai. No decisive action with the Imperialists had taken place. The latter were still in force around Nankin.

NEW YORK BANKS.—It appears from the first weekly statement of the N. Y. City Banks, fifty four in number, that they have a loan of \$97,889,449; specie \$9,746,441; circulation \$9,513,058; deposit \$57,996,255.

FOUR EDITORS IN NEW ORLEANS.—The yellow fever has been spreading in New Orleans, and four editors have been attacked by it. One of them, Mr. [Name], is now in a critical condition.

THE HOT WEATHER AND ITS DREAFFUL EFFECTS.—Since the thunder storm which occurred on Monday night last, the weather in New York has been excessively hot. On Tuesday the mercury ranged from 80 to 85 degrees during nine hours. On Wednesday, the heat increased to 90 degrees, and did not fall below 80 degrees for fifteen hours. On Thursday the mercury rose to 91 degrees, and the average temperature indicated by the thermometer for fifteen hours, was 86 1/4 degrees. Yesterday at 8 A.M. the mercury stood at 82 degree, at 3 P.M. it reached 93 degrees, and at 6 P.M. it had not fallen below 88 degrees. To-day the heat is no less intense than it was yesterday. The sky is unclouded, and the sun shines with "forceful rays." At 12 1/2 o'clock the thermometer at Pike's in Broadway indicated a temperature of 94 degrees in the shade!

The books of the coroners' office present a terrible record of deaths from sun strokes. Thirty fatal cases were reported up to 5 o'clock yesterday afternoon, and a great number of persons were seriously indisposed by the heat. The poor horses doomed to the drudgery of dragging the omnibuses and railcars are equally fatal. A number of these unfortunate animals fell dead yesterday, and many were incapacitated for labor. To add to the misfortunes of the horses, during this hot weather all the public vehicles are crowded more than usual, every body who can ride being too warm and too indolent to walk.

N. Y. Com. Ad.

THE INEFFICIENCY OF MUNICIPAL OFFICERS "sticks out" at New Orleans. In the cemetery of the 5th district six men were constantly employed digging the shallow graves for the victims of the pestilence, but were unable to provide for all the corpses carried there by the carmen. Forty of them remained above ground from Friday evening the 5th till Sunday morning the 7th. Some of the swollen bodies burst their coffins, and the effluvia rendered the neighborhood horrible.

When the citizens complained, the street commissioners replied that it was difficult to obtain laborers to do the work of burial, and the mayor, when informed of the facts, said the matter "did not fall within his line of duty!" In the same cemetery on Sunday night, Sept. 1st, seventy-eight corpses were buried, although men had been burying the dead all day. The board of health had offered \$5 an hour for additional grave diggers, without obtaining them. In St. Patrick's cemetery corpses were left uncovered on account of scruples about consecrated and unconsecrated ground.

DEATH OF A YOUNG LADY BY DROWN-ING.—On Friday evening, Miss Hughes, a young lady from Syracuse, who for a few days back had been stopping with the family of Mr. Benson, at the corner of 84th street, while bathing in the East River at the foot of 25th street, was drowned.

While enjoying the water, Miss Hughes was suddenly seized, as is supposed, with a cramp, and screaming, sunk beneath the surface. A young man who was with Miss Hughes at the time, attempted to swim to the shore, but also sunk; Mr. Benson went out to her assistance, but was seized by the young man, and drawn under the water. They finally succeeded in reaching the shore, when Mr. Benson again started to go back for Miss Hughes, but was seized with cramps, and unable to do anything to save her, and she was carried, in a moment beyond their reach, by the under current.

"HOW LONG SHALL WE WAIT?"—A few years ago, the late superintendent of the Eastern Railroad, in reply to a conductor who asked the question, "How long shall we wait for the up train when it is late, before we can proceed?" said, "Wait until the wheels rust off, and then get new ones." Without doubt the Superintendent would be voted an "old fogey," by a large portion of the community—a man by no means fast enough for the present generation, inasmuch

New York Grain Market.
There has been a good demand for wheat, chiefly export, and as the supplies are not large, and the current market, prices are well supported, the market closing fairly—the sales are for good white wheat \$1.26 in bond, for prime new Orleans, equal to \$1.40; choice white Michigan 1.34, common Ohio 1.28; good to prime do 1.30 a 1.33; red do 1.16; 12,000 white do 1.27 a 1.28. Rye and corn have advanced, with sales of old Rye at 90 cents, and new do 85 cents. Corn, equal to \$1.25 delivered. In barley there has been a demand for Harbly Malt sold at \$1. Oats have been in the supply, and prices have receded about one cent. Corn has arrived since freely, and in the absence of speculation, prices have fallen off about two cents, the market, however, closed firmly.
